## AFTERBURNER™ TAILLIGHT SYSTEMS

- The ultimate solution for taillight, turn signal and running light placement on stock and custom bikes
- **Afterburner™** taillight systems are designed to fit over BT Smooth Ride and Harley-Davidson® OEM shock absorbers for Dyna®, FXR®, FX®, Sportster® and V-Rod® models
- Super-bright LED arrays for maximum visibility
- Show-polished billet aluminum construction
- As with most LED lighting systems, a load equalizer may be required to work on certain models
- A multi-function module is required for taillight/turn signal/running light function
- New designs for other popular OEM and aftermarket shock absorbers coming soon
- Sold per pair

Afterburner™ taillights shown installed on BT shock absorbers (not included)
